

Item # Scorpio Plus XL, High Speed Wire Rope Models

High Speed Wire Rope Models

The Scorpio Plus XL wire rope hoist is the perfect jobsite partner. This construction hoist can be easily installed on the leg of virtually any scaffold configuration due to its super light weight of less than 100lbs. This hoist is the most efficient alternative to rope & pulley systems, cranes, and forklifts.

Hoist Features

- Perfect for light weight, smaller projects in confined spaces
- Very mobile on a jobsite due to super light 95lb weight
- Confined and hard to reach spaces made easy with a portable hoist
- Maximum safety and efficient alternative to rope & pulley systems, cranes, and forklifts
- Installed easily on existing scaffold systems, work platforms, I-Beams, and rooftop mounting options
- Control your work flow, schedule and budget with the most efficient and safe material delivery to any work level
- Optional Vertical Post Mounting System easily attaches to the leg of scaffolding and pivots 180°, allowing convenient loading and unloading of materials at any work level.
- Hoist Safety Features

Industries Served

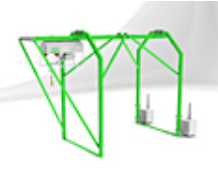

Scaffolding, Construction, Masonry, Restoration, Stucco

HOIST SPECIFICATIONS

Set-up	Single Line
Lifting Capacity	400 lbs.
Lift Speed	80 fpm
Lifting Height	160 ft
Unit Weight	90 lbs
Shipping Weight	102 lbs
Controller Type	Dual Control - Optional Extendable Pendant - Standard Wireless Control - Optional
A/C Power	110V, 15 Amp, 1Φ, 1HP

MOUNTING SYSTEM OPTIONS

<p>Vertical Post</p>	<p>Our simplest mounting system is perfect for attaching our lighter weight hoist to existing scaffolding. This mount pivots 180 degrees, allowing convenient unloading at work level.</p> <p>Max. load lift- 400 lbs. Headroom- 19.75 in.</p> 
<p>Trestle Monorail</p>	<p>Our heavy-duty mounting system is perfect for our large capacity hoists. This mount is easily installed for between-the-floor or rooftop lifting, but must be properly counterbalanced.</p> <p>Max. Load Lift*-2000 lbs. Outward Cantilever - 3.5 ft. Headroom- 23.00 in.</p> 
<p>I-Beam Trolley</p>	<p>Our most flexible and versatile mounting system is used with all of our large capacity hoists. The addition of a rolling I-Beam Trolley Top allows many Beta Max Hoists to adapt to existing I-Beams. If the horizontal trolley is not necessary Beta Max offers a Fixed I-Beam Top which firmly holds the hoist stationery on the I-Beam.</p> <p>Max. Load Lift*- 2000 lbs. Headroom- 23.00 in.</p> 
<p>Scaff Trac</p>	<p>Our most popular mounting system attaches in minutes, with no tools, to existing scaffolding and is used with all Beta Max hoists. Unlimited system lengths are available using add-on 7 ft. Scaff-Trac extensions.</p> <p>Max. Load Lift* - 1200 lbs. when used with conventional scaffolding. Outward Cantilever - 3.5 ft Headroom- 23.00 in.</p> 
<p>Mac-Trac</p>	<p>The Mac-Trac is especially designed for mason's type scaffold frames and is specified with our Scorpio Plus Hoist. The Mac-Trac offers perpendicular mounting to the building and can carry up to 500 lbs. The cross brace is removed at the hoist level and replaced with a horizontal support bar. The Mac-Trac (Mason & Chimney) System is also available for use with 5 ft. mason-type scaffold frames.</p> <p>Max. Load Lift* - 500 lbs. when used with conventional scaffolding. Headroom- 23.00 in.</p>
